Session planned by the Core Research Cluster of Disaster Science

**Cross-cutting the Disaster-
Related Sciences: Challenges of
a Multidisciplinary Group
in Tohoku University**

Town of Shichigahama

In order to share the experiences and lessons learned from the 2011 Great East Japan Earthquake and tsunami, and to develop support for reconstruction, we will discuss the recovery and reconstruction strategy and future issues in the disaster-affected area which is Shichigahama Town, Miyagi Prefecture.

And we discuss the role of disaster science (trans-science, civil science) for building disaster resilience society.

- **DATE & TIME : 16:00-17:30,
10th November, 2019
(World BOSAI Forum)**
- **VENUE : TACHIBANA橋, Sendai International Center**
